HOW OLD IS THE RACE? How long has man—the great crowning work of the creation—been upon the earth? Here we are lost. The discoveries in Switzerland go to show that two or three races, pre-historical, pre-Adamite, had lived in wooden cities built on pilars extending quired for the soil to collect above them .-In the Pyrenees, also, human bones have been found with the bones of animals extinct before history began. In Kentucky, in 1838, the remains of an extinct animal were dis-entombed, as large as an elephant, that had been mired and destroyed by human beings. The whole were nine feet below the surface. There was found a lay-er of charcoal six to twelve inches thick, arrow heads, tomahawks and pieces of rock. The fore and hind feet were standing in a perpendicular position, and like-wise the full length of the leg below the ashes, so deep in the mud and water that the fire which had clearly been kindled to destroy the animal, had no effect on them. A POINTED REBURE

A debate took place in the U. S. Senate recently, on the question of illegal arrests. It was contended by many Senators of both parties that no man can be arrested with-out "due process of law," and that military trials are mere mockeries, unconstitutional, unlawful, and villainous. Conness, the miserable creature who misrepresents the great State of California in the Senate, expressed himself in favor of illegal arrests and trial by drunken military courts. In his speech on the cul-ject he said he "cared nothing for the Constitution." Senator Trumbull, of Illinois, who is a strong Republican partisan, but unlike most prominant. neht men of that party, opposed to fulldeli-ty, perjury and wickedness, replied to the expression used by Conners, and in doing so literally skinned the poor Infidel alive

We quote from the Gbbe:

Mr. Trumbull. A word or two and only a word or two as to the Senator from California, [Mr. Conness.] who modestly assumes so much patriotism, and if patriotism consists in noise and bluster, he certainly is possessed of a great deal. He made himself heard most certainly, and he talks of "croaking," and of "cowards," and says that he cares nothing for the Constitution, Has that woman a call to be a wife who migrate to Dahomey, or somewhere else. thinks more of her silk dress than her children, and visits her nursery no oftener than once a day? The "dancing plagues" of the thirteenth and fourteenth centuries, in Europe, thus supervened upon the complete prostintion of particular of nature. These strange disorders were propagated as upon the beams of the light and the of men through the morbid excitement of their minds and their nervous systems.

The terrible "Black Death" which five centuries ago swept over Christendom, destroying advance. This is in some countries, as in Italy and England, nearly one half the population, followed the which we have any record. Destructive earthquakes, floods and famines had succeeded each other for several years consecutively, and had filled the continent with want, mittery, and least the continent with want, mittery and least the continent with want was a second of the continent with want want was a second of the continent with want was a second of the continent was a seco despair. It is a noticeable circumstance, in this con-

nection, that the increasing frequency of earthquakes and other phenomena of cosmical agtation has attracted the attention of the scien tific world during the past five years, and has given rise to a great deal of varied speculation as to its causes and consequences.

So far as we in America are concerned there can be no question that the agitation and eftervescence of men's minds, the general nervous and moral "exaltation" of the country in consequence of the tremendous avents of the ously predisposing us to extraordinary epidem-

Whatever be its origin, it is he editory in the constitution, descending from parents to children unto the third and fourth reneration; "indeed, it seems to be the rod of Hem who says. "I will visit the injunities of the inthers upon their visit the injunities of the tallers upon their children." The diseases it originates take various names, according to the organs it attacks. In the lungs, Scrofula produces tubercies, and finally Consumption; in the lands of the consumption; in the lands of th glands, swellings which suppurate and be-come ulcerous sores; in the stomach and bowels, derangements which produce indigestion, dyspepsia, and liver complaints; on the skin, eruptive and cutaneous affections. These, all having the same origin, require the same remedy, viz., purification and invigora-tion of the blood. Purify the blood, and these dangerous distempers leave you. With feeble, foul, or corrupted blood, you cannot have health; with that, "life of the flesh" healthy, you cannot have scrofulous disease. Ayer's Sarsaparilla 6

is compounded from the most effectual antidotes that medical science has discovered for this afflicting distemper, and for the cure of the disorders it entails. That it is far superior to any other remedy yet devised, is known by all who have given it a trial. That It does combine virtues truly extraordinary in their effect upon this class of complaints, is indisputably proven by the great multitude of publicly known and remarkable cures it has made of the following diseases: King's Evil, or Glandular Swellings, Tumors, Eruptions, Pimples, Blotches and Sores, Erysipelas, Rose or St. Anthony's Fire, Salt Rheum, Scald Head, Coughs from tuberculous deposits in the lungs, White Swellings, Debility, Dropsy, Neuralgia, Dyspepsia or Indigestion, Syphilis and Syphilitic Infections, Mercurial Diseases, Female Weaknesses, and, indeed, the whole series of complaints that arise from impurity of the blood. Minute reports of individual cases may be found in Aven's American ALHANAC, which is furnished to the druggists for gratuitous distribution, wherein may belearned the directions for its use, and some of the remarkable cures which it has made when all other remedies had failed to afford relief. Those cases are purposely taken from all sections of the country, in order that every reader may have access to some one who can speak to him of its benefits from personal experience. Scrofula depresses the vital energies, and thus leaves its victims far more subject to disease and its fatal results than are healthy constitutions. Hence it tends to shorten, and does greatly shorten, the average duration of human life. The vast importance of these considerations has led us to spend years in perfecting a sensedy which is adequate to its cure. This we now offer to the public under the name of Arra's Sarsaparitta, although it is composed of SARSAPARILLA, atmough it is composed of ingredients, some of which exceed the best of Sarsoparilla in alterative power. By its aid you may protect yourself from the suffering and danger of these disorders. Purge out the foul corruptions that rot and fester in the blood, purge out the causes of discuse, and vigorous health will follow. By its prengliar virtes this remedy stimulates the vital functions, and thus expels the distumpers which lurk within the system or burst out

on any part of it. We know the public have been descrived by many compounds of Sarsaparilla, that promised much and did nothing; but they will neither be deceived nor disappointed in this. Its virtues have been proven by abundant trial, and there remains no question of its surpassing excellence for the cure of the afflicting diseases it is intended to reach. Although under the same name, it is a very different medicine from any other which has been before the people, and is far note ef-

of the disease. This has been so long used and so universally known, that we need do no more than assure the public that its quality is kept up to the best it ever has been, and that it may be relied on to do all it has been done.
